PROFESSIONAL SUMMARY

Software Engineer with production experience in enterprise Java/Spring Boot microservices for high-volume BFSI systems. Optimizing PL/SQL queries (30–40% gains), implementing Business Rules Engines across 17+ financial products, and building event-driven platforms with Kafka and Kubernetes. Full-stack proficiency in React/Next.js.

PROFESSIONAL EXPERIENCE

Systems Engineer (Java Developer)

Tata Consultancy Services

Oct 2024 – Present

Kolkata, India

- Engineered production-grade backend microservices for a large-scale insurance platform processing 100K+ daily policy transactions across multiple lines of business.
- Implemented and configured complex business logic within a centralized Business Rules Engine (BRE) across 17 financial products, automating dynamic premium calculations and underwriting validations that reduced policy change turnaround times by 60%.
- Designed robust RESTful APIs for policy lifecycle operations while optimizing complex PL/SQL stored procedures, improving query execution time by 30–40% and reducing downstream errors by 25%.
- Tech Stack:** Java 11/17 · Spring Boot · Spring Data JPA · PostgreSQL · PL/SQL · REST APIs · Maven · Git

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Vinoba Bhave University, Hazaribagh

2021 – 2024

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C++

Backend: Spring Boot, Node.js, Express.js

Frontend: React.js, Next.js, Redux, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL

Messaging: Apache Kafka, Socket.io

Cloud/DevOps: AWS, Docker, Kubernetes, ArgoCD, GitHub Actions

Tools: Git, Postman, NGINX, Stripe API, WebRTC

PROJECTS

• [Pizza Delivery Platform — Microservices & Event-Driven Architecture](#)

Production-grade, multi-tenant ordering platform featuring 5 Node.js microservices communicating via Apache Kafka, a PostgreSQL-backed RBAC Auth Service with JWT rotation, and an event-driven price cache yielding a 70% latency reduction. Integrated Stripe webhook verification and Socket.io tracking; deployed on AWS EKS via GitHub Actions and ArgoCD GitOps pipelines.

Tech: Node.js · PostgreSQL · MongoDB · Kafka · Kubernetes · Docker · AWS · Next.js

Source: github.com/roshan798/pizza-delivery-app

• [VoiceHub — Real-Time Group Voice Calling Application](#)

WebRTC-based group voice calling platform with React frontend, Node.js/Express signaling server, and MongoDB. Implemented peer-to-peer audio streaming with Socket.io for SDP exchange and ICE candidate relay.

Tech: React · Node.js · MongoDB · WebRTC · Socket.io Source: github.com/roshan798/voicehub.me

ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming:** LeetCode 1750+ rating (56+ contests, top 1300 globally in Contest 376), 600+ problems solved across platforms, and a HackerRank 6-Star tier in algorithmic problem-solving.
- Certifications:** [HackerRank Problem Solving](#) · [freeCodeCamp Responsive Web Design](#) · [Hacktoberfest Contributor](#)
