

ROSHAN KUMAR

+91 6205980916 ◇ Kolkata, India

roshankumar_2022@outlook.com · [LinkedIn](#) · [GitHub](#) · [LeetCode](#) · [Portfolio](#)

OBJECTIVE

Frontend Developer with strong hands-on experience building performant, responsive, and accessible web applications using React.js, Next.js, and TypeScript. Skilled in integrating real-time features (Socket.io, WebRTC), payment flows (Stripe), and REST APIs into polished user interfaces. Focused on delivering intuitive, component-driven UX at production scale.

EXPERIENCE

Assistant System Engineer

Tata Consultancy Services (TCS)

Oct 2024 – Present

Kolkata, India

- Completed onboarding training in **Java** and **Spring Boot**; applied REST API and MVC patterns relevant to full-stack development.
- Tech:** Java · Spring Boot · SQL · JavaScript

EDUCATION

B.Tech in Computer Science & Engineering

Vinoba Bhawe University, Hazaribagh

2021 – 2024

SKILLS

Languages JavaScript, TypeScript, HTML, CSS
Frontend React.js, Next.js, Redux, Tailwind CSS
Real-time Socket.io, WebRTC

Backend Node.js, Express.js, REST APIs
Payment Stripe.js, Stripe Checkout
Tools Git, Figma, Postman, Vercel

PROJECTS

- Pizza Delivery Platform** mern-pizza-app.cyou
Full-stack, multi-tenant pizza ordering platform with a strong focus on user experience, real-time interactivity, and seamless payment flow.
 - Built the **customer storefront** in **Next.js 14** (App Router) with server-side rendering for fast initial load; dynamic pizza customization UI (size, crust, toppings) with live price calculation and an accessible, mobile-responsive cart.
 - Developed the **Admin Dashboard** in **React + Vite** for tenant managers: real-time order notification panel where new orders appear instantly via **Socket.io** without page refresh; product and topping CRUD with image upload preview; order status management with status-flow validation.
 - Implemented a live **order tracking UI** on the customer app: status transitions (Confirmed → Prepared → On Route → Delivered) animate in real time via **Socket.io**, eliminating the need for polling.
 - Integrated **Stripe.js** checkout redirect for card payments; handled post-payment redirect and order confirmation state management on the client.
 - Designed fully **responsive, accessible** layouts with **Tailwind CSS**; deployed both frontends on **Vercel** with automatic preview deployments on pull requests.
 - Tech:** Next.js · React · TypeScript · Tailwind CSS · Socket.io · Stripe.js · Vercelgithub.com/roshan798/pizza-delivery-app
- VoiceHub** [Real-time Group Voice Calling App](https://github.com/roshan798/voicehub.me)
Browser-based group voice calling platform with a focus on real-time UX and peer connectivity.
 - Built a **React** SPA with dynamic room management: create/join rooms, live participant list, mute/unmute controls, and connection status indicators — all updating in real time via **Socket.IO**.
 - Integrated **WebRTC** for low-latency, peer-to-peer audio streaming; implemented ICE candidate exchange and offer/answer signalling through the Socket.IO backend.github.com/roshan798/voicehub.me
- i-Notebook App** [Full-Stack Note Management App](#)
Responsive note-taking SPA with complete CRUD, authentication, and clean component architecture.

- Built **React** frontend with context-based state management, protected routes, and a responsive UI using **Tailwind CSS**; deployed on **Vercel**.
- Implemented **JWT authentication** with token-based protected routes on the client; **Node.js + Express** REST backend with **MySQL** for persistence.
