OBJECTIVE

Aspiring Full-Stack Developer with hands-on experience in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Eager to contribute to a dynamic team by leveraging my skills in both frontend and backend technologies to build user-centric solutions.

EXPERIENCE

Systems Engineer (Java Developer)

Tata Consultancy Services

Oct 2024 – Present

Kolkata, India

- Engineered robust backend microservices for a large-scale insurance platform handling high-volume policy transactional workflows.
- Developed and optimized complex insurance policy lifecycle logic, including rule-based validations, tariff calculations, and multi-stage endorsement workflows.
- Refactored and tuned complex PL/SQL procedures, improving query performance by 30%–40% and significantly reducing execution latency in high-throughput environments.
- Collaborated with cross-functional teams and stakeholders to translate ambiguous business requirements into scalable, clean Java code.
- Skills:** Java · Spring Boot · PL/SQL · REST APIs

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Vinoba Bhave University, Hazaribagh

2021 – 2024

SKILLS

Languages	Java, C++, JavaScript, TypeScript	Databases	PostgreSQL, MongoDB, MySQL
Frontend	HTML, CSS, Tailwind CSS, React.js, Redux	Infra	Docker, Kubernetes, AWS S3
Backend	Node.js, Express.js, Spring Boot	Tools	Git, Kafka, Postman, ArgoCD

PROJECTS

- Pizza Delivery Platform**
Multi-tenant pizza ordering platform with 5 Node.js microservices communicating via **Kafka**; Order Service maintains a local product price cache from Kafka events to validate checkout prices without cross-service HTTP calls. Integrated **Stripe** payments with webhook verification and **Socket.io** for real-time order tracking. Deployed on **AWS EKS** with NGINX Ingress; GitOps CI/CD via GitHub Actions + **ArgoCD**; frontends on **Vercel**.
Tech: Node.js · PostgreSQL · MongoDB · Kafka · Kubernetes · Docker · Stripe · Next.js · React
Source: github.com/roshan798/pizza-delivery-app
- VoiceHub** — Real-time Group Voice Calling App
Designed and developed a real-time group voice calling platform using **React** (frontend), **Node.js** with Express (backend), and **MongoDB**. Integrated **WebRTC** and **Socket.IO** for peer-to-peer audio streaming and room management. Built and tested RESTful APIs using Postman.
Source: github.com/roshan798/voicehub.me
- i-Notebook App** — Full-Stack Note Management App
Developed a full-stack note-taking application with complete CRUD functionality using **React**, **Node.js**, Express, and **MySQL**. Implemented JWT-based authentication and a responsive UI with Tailwind CSS.

ACHIEVEMENTS

- Achieved a **1750+ contest rating** on LeetCode, participated in 56+ contests, and ranked globally within the top 1300 in Weekly Contest 376.
- Solved over **600 problems** on coding platforms, including [LeetCode](#), [GFG](#), and [HackerRank](#).

- Earned a **6-star** rating in HackerRank Problem Solving.

CERTIFICATES

- [HackerRank Problem Solving](#)
- [Responsive Web Design](#)
- [Hacktoberfest Tree Planting](#)
