PROFESSIONAL SUMMARY

Software Engineer with production experience in enterprise Java/Spring Boot microservices for high-volume BFSI systems. Optimizing PL/SQL queries (30–40% gains), implementing Business Rules across 17+ financial products, and building event-driven platforms with Kafka and Kubernetes. Full-stack proficiency in React/Next.js.

PROFESSIONAL EXPERIENCE

Systems Engineer (Java Developer)

Oct 2024 – Present

Tata Consultancy Services

Kolkata, India

- Engineered production-grade backend microservices for a large-scale insurance platform processing 100K+ daily policy transactions across multiple lines of business.
- Implemented and configured complex business logic within a centralized Business Rules (BRE) across 17 financial products, automating dynamic premium calculations and underwriting validations that reduced policy change turnaround times by 60%.
- Designed robust RESTful APIs for policy lifecycle operations while optimizing complex PL/SQL stored procedures, improving query execution time by 30–40% and reducing downstream errors by 25%.
- Tech Stack:** Java · Spring Boot · Spring Data JPA · PL/SQL · REST APIs · Gradle.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

2021 – 2024

Vinoba Bhave University, Hazaribagh

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, C++

Backend: Spring Boot, Node.js, Express.js

Frontend: React.js, Next.js, Redux, Tailwind CSS

Databases: PostgreSQL, MongoDB, MySQL

Messaging: Apache Kafka, Socket.io

Cloud/DevOps: AWS, Docker, Kubernetes, ArgoCD, GitHub Actions

Tools: Git, Postman, NGINX, Stripe API, WebRTC

PROJECTS

• [Pizza Delivery Platform — Microservices & Event-Driven Architecture](#)

- Architected a production-grade, multi-tenant ordering platform featuring 5 Node.js **microservices** decoupled via Apache **Kafka** message brokers.
- Implemented an event-driven product price cache yielding a **70% latency reduction** alongside a PostgreSQL-backed **RBAC** Auth Service with **JWT** rotation.
- Integrated **Stripe** webhook cryptographic verification for payments and **Socket.io** for real-time live order tracking.
- Deployed containerized infrastructure on **AWS EKS** managed by **GitOps** CI/CD pipelines using GitHub Actions and **ArgoCD**.
- Tech Stack:** Node.js · PostgreSQL · MongoDB · Kafka · Kubernetes · Docker · AWS · Next.js
- Source:* github.com/roshan798/pizza-delivery-app

• [VoiceHub — Real-Time Group Voice Calling Application](#)

- Built a browser-based, multi-user voice calling platform using a React frontend paired with a Node.js/Express signaling backend and MongoDB.
- Implemented mesh **WebRTC** peer-to-peer audio streaming with **Socket.io** orchestration for stable SDP exchange and ICE candidate relay sessions.
- Tech Stack:** React · Node.js · MongoDB · WebRTC · Socket.io
- Source:* github.com/roshan798/voicehub.me

ACHIEVEMENTS & CERTIFICATIONS

- Competitive Programming:** LeetCode 1750+ rating (56+ contests), 600+ problems solved across platforms.
- Certifications:** [HackerRank Problem Solving](#) · [freeCodeCamp Responsive Web Design](#) · [Hacktoberfest Contributor](#)
