roshankumar_2022@outlook.com · [LinkedIn](#) · [GitHub](#) · [LeetCode](#) · [Portfolio](#)

OBJECTIVE

Full-Stack Developer with end-to-end experience architecting, building, and deploying production-grade web applications. Proficient across the entire stack — from React and Next.js frontends to Node.js microservices, event-driven systems with Kafka, and Kubernetes deployments. Passionate about clean system design, developer experience, and shipping reliable software.

EXPERIENCE

Assistant System Engineer

Tata Consultancy Services (TCS)

Oct 2024 – Present

Kolkata, India

- Completed onboarding training in **Java** and **Spring Boot**, building REST APIs with SQL-backed persistence layers.
- Tech:** Java · Spring Boot · SQL · JavaScript

EDUCATION

B.Tech in Computer Science & Engineering

Vinoba Bhawe University, Hazaribagh

2021 – 2024

SKILLS

Languages	Java, C++, JavaScript, TypeScript	Databases	PostgreSQL, MongoDB, MySQL
Frontend	React.js, Next.js, Redux, Tailwind CSS	Infra	Docker, Kubernetes, AWS S3
Backend	Node.js, Express.js, Spring Boot	Tools	Kafka, Socket.io, Git, Postman

PROJECTS

- Pizza Delivery Platform** mern-pizza-app.cyou
End-to-end, multi-tenant pizza ordering platform spanning microservices backend and polished React frontends — built and deployed to production.
 - Backend:** 5 independently deployed **Node.js** microservices. Auth Service uses **PostgreSQL** with JWT access + refresh token rotation and RBAC (Admin / Manager / Customer); services validate tokens locally, removing Auth as a synchronous dependency.
 - Event-driven:** **Kafka** decouples Catalog from Order Service — catalog mutation events keep Order's local price cache in sync, so checkout validates prices without cross-service HTTP calls. A single ORDER_PLACED event fans out to both WebSocket and Notification services independently.
 - Payments & real-time:** **Stripe** PaymentIntent with webhook verification for card orders; **Socket.io** pushes live status updates (Confirmed → Delivered) to both customer and manager UIs without polling.
 - Frontend:** Customer storefront in **Next.js 14** (App Router, SSR) with dynamic pizza customization and Stripe checkout; Admin Dashboard in **React + Vite** with real-time order notification panel, product/topping CRUD, and status management.
 - Infra:** Backend on **AWS EKS**; **ArgoCD** GitOps with GitHub Actions; NGINX Ingress for SSL and routing; frontends on **Vercel**.
 - Tech:** Node.js · PostgreSQL · MongoDB · Kafka · Stripe · Socket.io · AWS S3 · Kubernetes · Docker · ArgoCD · Next.js · React

github.com/roshan798/pizza-delivery-app

- **VoiceHub** — Real-time Group Voice Calling App
Browser-based group voice calling app using **WebRTC** for peer-to-peer audio streaming and **Socket.IO** for signalling and room management; **React** SPA frontend, **Node.js** + **Express** backend with **MongoDB**.
github.com/roshan798/voicehub.me
- **i-Notebook App** — Full-Stack Note Management
Responsive note-taking SPA with JWT authentication and CRUD functionality using React, Tailwind CSS, Node.js, Express, and MySQL.

ACHIEVEMENTS

- Achieved **1750+ contest rating** on LeetCode; participated in **56+ contests** and ranked in the **global top 1300** in Weekly Contest 376.
- Solved **600+ problems** across [LeetCode](#), [GeeksForGeeks](#), and [HackerRank](#).
- Earned **6-star Gold** badge in HackerRank Problem Solving.

CERTIFICATES

- [HackerRank Problem Solving](#)
- [freeCodeCamp Responsive Web Design](#)
- [Hacktoberfest Contributor](#)
